Cuba – a Process of the Infinite Victory of Fidel and Che, even the Revolt and finally a Black Rights with White Folk around

By Shomit Sirohi

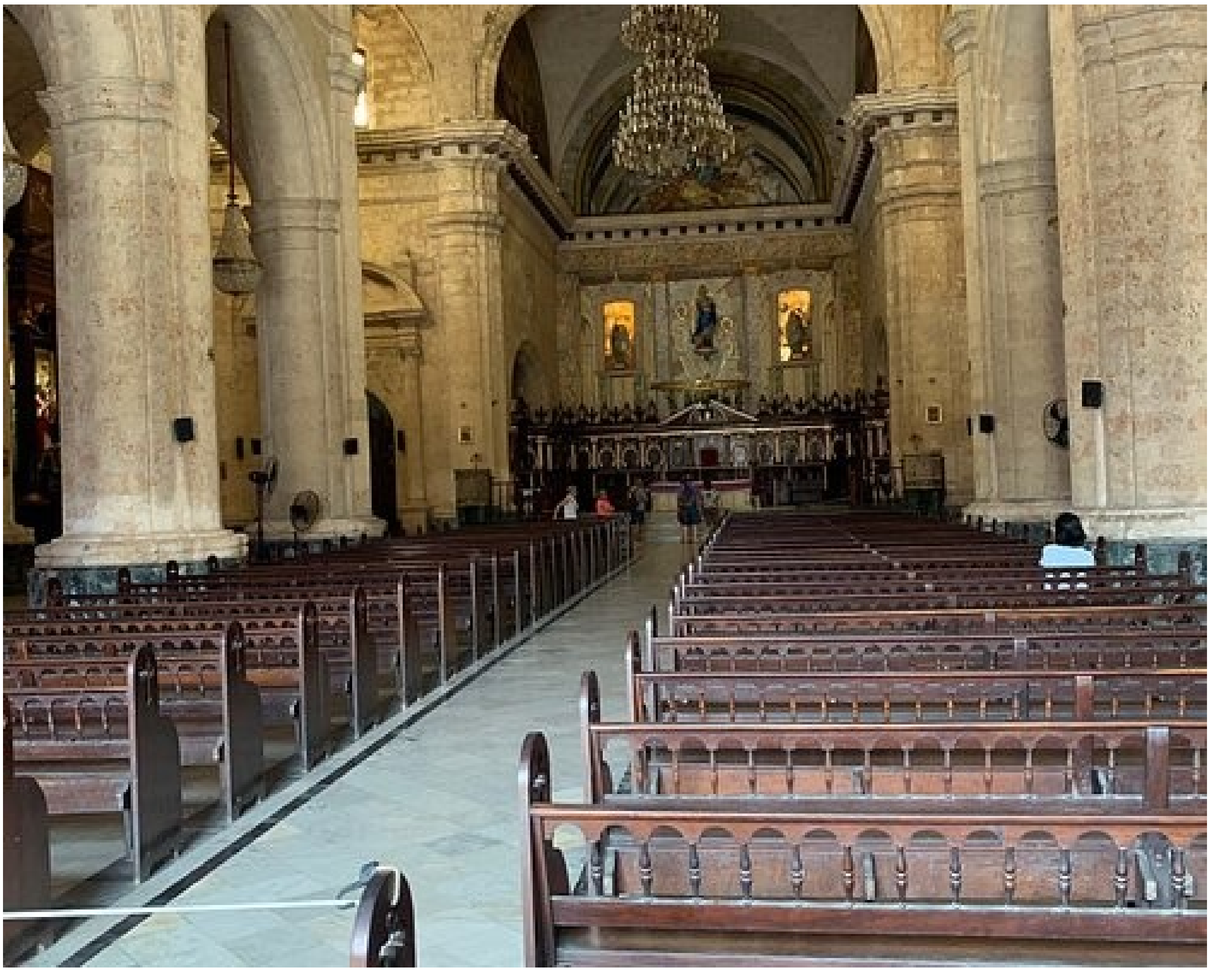

I. Havana – ava

II. Essay

I produce after the long photo-essay with Retamar which covers the alleyways and poorer sections of Cuban living in Havana – the na side in some complexity with the ava side and then of course the Ha- side being Fidel and Hotel Nacional process.

I am busy in fact covering in a pure Fedora and light Chinese shirt with chinos – that in fact there is room for Derrida afterall. What Althusser meant by the Adventure of French structuralism – was to contingently develop a Derrideanism – like conjuncture and refleccion or even finally refleccion en Cuba – which is complex refleccion perhaps and this makes it a refleccion.

Imagine just the process of reflejo then and conjuncture – the Partido Communista reflejo la Granma and empieca le partida processo and the people reflect the line and live in revolt.

I am busy reading Phenomenology of Mind and Science of Logic – but I articulate it to Derrida there. And I add my own process – Sirohian which I call tendencies – like my own process 'la reflejo or reflecciones con la processo de Cuba, y Algeria, China and India – which then should be led this way perhaps – just the architectural plan and ecology.'

I argue that it is possible then to live equally – but in fact there is capital in India – even discotheques and hotels all priced up and like swimming pools in Christian Bible – I mean I tour then to India, as policy.

We are internationalists. I am busy understanding Trotsky as Cuba – why they love him there and me. On another day it is my international duty – I am in France.
